The Taiwanese Journal for Studies of Science, Technology and Medicine

The Taiwanese Journal for Studies of Science, Technology and Medicine is a bilingual (Chinese and English) peer-reviewed journal devoted to the historical, social, philosophical, anthropological, political, and interdisciplinary studies of science, technology, and medicine. Our special interests are the ways in which the Taiwanese and Chinese societies deal with STM-related issues in their culturally and historically specific contexts. Related articles on other countries or areas are also welcome.

STM is published semi-annually by the National Science and Technology Museum (Taiwan) in April and October. [Issue 6 (April 2008): Risk and Governance; Issue 7 (October 2008): Exhibiting Science and Technology (including a special section on "Ian Hacking meets Taiwanese critics")]
