This pioneering monograph—based primarily on Brazilian sources—traces the evolution of Brazilian nationalism from its origins in the nativism of the sixteenth century to the aggressive modernizing and reforming nationalism of today. A new series of monographs on Latin American history, geography, economics and social studies. Each volume is a detailed study based on original research.

1. Ideas and Politics of Chilean Independence 1808-1833
   SIMON COLLIER

A study of the interplay of political ideas and action in Chile from the beginning of the Spanish imperial crisis in 1808 to the effective stabilization of the new republic under Diego Portales.

The book is based on the writings of the Chilean 'patriots', and shows how they adopted the liberal political philosophy of the Enlightenment and of the American and French revolutions. $11.00

2. Church Wealth in Mexico
   MICHAEL P. COSTELOE

An examination of the Juzgado de Capellanías in the Archbishopric of Mexico from 1800 to 1856. This was the most important fiscal institution within the Roman Catholic Church in Latin America, operating as a kind of bank in each diocese and investing clerical revenues by means of loans at interest.

Dr Costeloe analyses its workings and its significance in Church-State relations and in Mexico's economic development. $5.50
Cambridge Latin American Studies

3. The Mexican Revolution 1910-1914
   PETER CALVERT

A study of the development of the Mexican revolution between 1910 and 1914 and of the associated diplomatic conflict between Britain and the United States. For the first time the British side of the conflict is examined in detail from original documentary sources.

The author presents new information on key events in the rise and fall of the Madero and Huerta governments. $9.50

4. Britain and the Onset of Modernization in Brazil 1850-1914
   RICHARD GRAHAM

Professor Graham describes British involvement at key points in the initial stages of Brazilian modernization, showing how in some sectors—for instance their hold on the import-export economy—the British acted as a brake, and in others—such as expansion of the coffee economy—they fostered change and growth.

The British role in areas other than economic development is also discussed. $9.50

Catalog of the
LATIN AMERICAN COLLECTION
of The University of Texas Library
Austin, Texas

The Latin American Collection of The Library of the University of Texas was established in 1921 with the purchase of the personal library of Genaro García, outstanding Mexican historian and bibliophile. Through the acquisition of large collections, normal library purchases of individual titles, personal gifts, and numerous exchange arrangements with institutions in Latin America and other countries, the Latin American Collection has continued to build its research sources.

In the library's 160,000 volumes from the 15th century to the present can be found information on virtually any subject relating to Latin America. Admirably supplementing the printed materials are non-book materials as well as an extensive collection of manuscripts, some of which date back to the 16th century.

The catalog is a dictionary catalog of authors, titles and subjects for books, pamphlets, periodicals, newspapers and microfilm. A few manuscripts are also represented.

Estimated 540,000 cards reproduced in 31 volumes

Prepublication price: $1700.00; after April 30, 1969: $2100.00
