A study of the life, work, and posthumous reputation of Arnold Toynbee, economic historian who was adopted as the patron saint of liberal movements after his death in 1883. Kadish examines the nature of Toynbee’s posthumous popularity in relation to his diverse interests including church reform, New Liberalism, municipal politics, adult education, and the efforts of the ‘Young Liberals’ of the 1870s to work out an alternative to classical liberalism. Kadish further examines the intellectual development that lead to Toynbee’s influential work *Lectures on the Industrial Revolution* (1884). In examining Toynbee’s life and legacy, Kadish illuminates not only the questions of his day, but the origins of those that confront us today.

Lord Acton's concept of Liberty was the theme of the essays collected in the first volume of this edition, *Essays in the History of Liberty*. In this volume may be found the historical studies upon which Acton drew to explicate his understanding of the idea of liberty.

Writing on such diverse topics as the divorce of Henry VIII, Leopold von Ranke, and the History of the Papacy, Acton argued his position that history demonstrated progress and unity through the story of liberty.

Included here are Acton's most important historical essays from his days as a scholarly journalist and his famous Inaugural Lecture at Cambridge in 1895, "The Study of History."

These two volumes, edited by J. Rufus Fears, Professor of Classical Studies at Boston University, will be followed by a concluding volume entitled *Essays in Religion, Politics, and Morality.*
