A History of Economic Thought
The LSE Lectures
Lionel Robbins
Edited by Steven G. Medema and Warren J. Samuels
With a foreword by William J. Baumol

Lord Robbins (1898–1984) was a remarkably accomplished thinker, writer, and public figure. As a historian of economic ideas, he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century. These lectures, delivered at the London School of Economics between 1979 and 1981, display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject, his eloquence, and his incisive wit.

"Anyone reading these lectures can, and surely will, admire their style, the range of material they cover, the dazzling intellectual brilliance, and the stimulation they provide."
—From the foreword by William J. Baumol

Cloth $39.95 ISBN 0-691-01244-X

Max Weber and the Idea of Economic Sociology
Richard Swedberg

While most people are familiar with The Protestant Ethic and the Spirit of Capitalism, few know that during the last decade of his life Max Weber also tried to develop a new way of analyzing economic phenomena, which he termed "economic sociology." Indeed, this effort occupies the central place in Weber's thought during the years just before his death. Richard Swedberg here offers a critical presentation and the first major study of this fascinating part of Weber's work.

"This book is unequivocally first-rate. Swedberg writes clearly, comprehensively, in a nuanced style, and with tremendous erudition."—Mark Perlman

Cloth $29.95 ISBN 0-691-02949-0
Analytic Narratives

Robert H. Bates, Avner Greif, Margaret Levi, Jean-Laurent Rosenthal, and Barry R. Weingast

Students of comparative politics have long faced a vexing dilemma: how can social scientists draw broad, applicable principles of political order from specific historical examples? In *Analytic Narratives*, five senior scholars offer a new and ambitious methodological response to this important question.

By employing rational-choice and game theory, the authors propose a way of extracting empirically testable, general hypotheses from particular cases. The result is both a methodological manifesto and an applied handbook.

"*Analytic Narratives* provides clear counter-evidence against claims about the limits of rational choice theory by showing that rational choice can engage facts in an enlightening way." — Andrew Rutten

Paper $19.95 ISBN 0-691-00129-4
Cloth $50.00 ISBN 0-691-00128-6

New and updated edition

Globalizing Capital

A History of the International Monetary System

Barry Eichengreen

"Barry Eichengreen . . . proves that good economics writing can be fascinating, exciting, illustrative, and still make a compelling point based on thorough analysis. . . . Tightly interweaving economic theory, politico-economic analysis, and historical fact, he takes the reader on a grand tour through his view of the last 150 years of the international monetary system. . . . [A] delightful reading for everyone interested in the political economy of international monetary relations. . . . [An] excellent and provocative essay."

— J. von Hagen, *Journal of Economics*

The aim of the journal is to stimulate interest and debate over the explanatory power and social consequences of Marxian economic and social analysis. To that end, it publishes studies that seek to discuss, elaborate, and/or extend Marxian theory. The concerns of the journal include theoretical and philosophical (methodological and epistemological) matters as well as more concrete empirical analysis — all work that leads to the further development of a distinctively Marxian discourse. Contributions are encouraged from people in many disciplines and from a wide range of perspectives. It is the editors’ belief that Marxian approaches to social theory are important for developing strategies toward radical social change—in particular, for ending class exploitation and the various forms of political, cultural, and psychological oppression including oppression based on race and gender. Research that explores these and related issues from a Marxian perspective are particularly welcome.
