

Vital Books in Fiscal Management

The Refunding of International Debt

by Henry J. Bittermann

This book includes sixteen case studies of particular countries and their debt histories and prospects, analysis and evaluation of various methods by which debt crises may be coped with, both in the short and long runs, and a discussion of some implications for the future of international financial and development policies. Dr. Bittermann's discussion will be of interest to students of international affairs, as well as developmental economics.

Public Investment Planning in Civilian Nuclear Power

by John M. Vernon

". . . this book is a good reference for anyone working in this area. The authors present a reasonably complete review of the literature through 1968. There is also one of the few literature reviews which contains an extensive survey of the Continental literature on the subject." *The Journal of Finance*

1971
