The aim of Gender, Place and Culture is to provide a forum for debate in human geography and related disciplines on theoretically-informed research concerned with gender issues. It also seeks to highlight the significance of such research for feminism and women’s studies. The editors seek articles based on primary research that address: the particularities and intersections of gender, race, ethnicity, age, (dis)ability, sexuality, class, culture and place; feminist, anti-racist, critical and radical geographies of space, place, nature and the environment; feminist geographies of difference, resistance, marginality and/or spatial negotiation; and, critical methodology.
